Welcome!

On behalf of the Boise ISSA Board of Officers, I would like to be the first to welcome you to the best regional conference of its kind in the great state of Idaho!

This is our **17th** year of providing educational forums, peer interaction opportunities, and conversations with industry leaders to our membership and a diverse group of cybersecurity professionals.

The Information Systems Security Association (ISSA)[®] is a not-for-profit, international organization whose primary goal is to promote management practices that will ensure the confidentiality, integrity, and availability of information resources. ISSA facilitates interaction and education to create a more successful environment for global information systems security and for the professionals involved. Members regularly include practitioners at all levels of the security field in a broad range of industries such as communications, education, healthcare, manufacturing, financial, and government.

I hope you to see you in April!

Ken Dunham
